

# A System Integration Solution

**Introducing** a new version of our ever-popular **Surface Mount Chase (SMC)** product line, the **MPS-SMC-16MU-KO**. To make them even better, we added laser cut **Knockouts** in 2 surfaces.

In the back we have a knockout for a 6-Gang Electrical Junction Box and in the bottom we have 2 Concentric knockouts for 2" and 1" conduit, plus a rectangular for Series 6000 Surface Raceway. To mount the enclosure to the wall we have 4 mounting holes in the back to make installation and connection to the enclosure easier and more flexible, with more options, for you.

Each **MPS-SMC-16MU-KO** enclosure supports the installation of 16 Module Units (MU's) from our wide range of blank and connectorized MPS panel.

Each **MPS-SMC-16MU-KO** enclosure is also

supplied with a pair of label strips, top and bottom, that are attached after and over the mounting screws once the MPS Panels have been installed. Projecting a clean and professional Connector Interface for the end user.
