

SPS (Standard Panel System)

SPS-19" Rack Panels. This product give you the option of offering your clients EIA compatible 19" rack panels fabricated from 1/8" Aluminum or from one of our Composite materials. The Composite panels are formed with a top and bottom flange while the Aluminum panels have a pair of support rails attached to the rear for strength and rigidity. Rack Panels are available in 1RU, 2RU, 3RU, 4RU, 5RU and 6RU height. Finishes ranging from brushed and black anodized for the Aluminum panels to matte black, white or brushed silver for the Composites panels. The Rack Panels can be supplied blank, blank with machined cutouts for connectors and/or controls; blanks with machined cutouts for connectors and/or controls and engraving or complete with connectors and/or controls and engraving to your specifications.

We also offer the 1RU and 2RU Aluminum Rack Panels with Label Strip(s), a single for the 1RU and two for the 2RU Panel. They can be positioned above or below the connectors or top and bottom, framing the connectors, for the 2RU panels. Both of these can be supplied with "Tiebars" to provide cable strain relief. Mounting screws for these are located behind the upper Label Strip, offering a neat and professional product. Each 19" Rack Panel is supplied with mounting hardware.

SPS-Gang Panels. This product line allows you to offer your clients custom connector and/or control interface panels that attach to industry standard 1-Gang to 6-Gang wall boxes, larger sizes can be supplied but not off-the-shelf. The panels are fabricated from 1/8" or 3/16" Aluminum which is brushed and anodized black ready to be machined and/or engraved to your specification. The panels are supplied as blanks or blanks with cutouts for connectors and/or controls, or complete with connectors and/or controls and engraving to your specifications. Please remember the space available is determined by the internal dimension of the electrical Ganged box mounted behind the panel.

For a modular solution for this type of user interface, look at our **MPS-Lite Ganged Adapter Plates**, they attach to the same ganged back boxes and supports a wide variety of connectorized and/or blank panels.

All of these panels, Rack or Ganged, are embedded in our MPS and MPS-Lite CAD Library drawings (DWG) available for you to download and create your own unique interface.
