

System Integration Solution 34

Introducing 2 new B size panels for MPS Lite
L-MPS-B9-xxx & L-MPS-B28

L-MPS-B9-N02 - an angled panel designed specifically to accommodate the Opticalcon Series LC Fiber Camera connectors from Neutrik.

Shown with an optional colored rubber washer. Will accommodate Dual, Quad, MTP12 or MTP24 versions of this connector. This formed

aluminum panel is designed to move the connector forward and angled down at an approx. 30 degree angle. This results in more space behind the connector and

a reduction in strain on the connector when the Camera cable plug is connected. This is particularly useful when installed in Ganged Adapter Wall Plates, where space is at a premium.

L-MPS-B28 – a flat panel with a "Brush" insert to allow cables to pass through the connector interface.

L-MPS-AV14-F
 with assorted
 MPS-Lite panels.

The **L-MPS-B9-N02** and **L-MPS-B28** installed in a **L-MPS-AV14-F** Adapter Plate with an assortment of other MPS Lite panels. Each of these panels fill a 2MU space.

Email your request for the **MPS LITE CAD Library Dwg.** to sales @sigt.com
